

Please add this to my last note..

If the AM FM radio companys are scard of XM why don't they improve there programing to include some of the thing that XM has. If this hapens they might Keep more listeners. Most people aer looking for different programing than what AM FM stations offer with less ADDS.

The people have to chose witch they like Not NAB or any other organization.

I think this is a big joke and should never have happened.
